# What do we do? What do we offer?

In Al Hammam Building Materials Trading Company, we supply basic building materials (steel, cement, aggregates, bricks, scrap... etc.) from manufacturers and importers and in various quantities, including delivery, handling, stocktaking, quality control and storage. All in coordination with supervision engineers, investors and their representatives. This is done comprehensively, with competitive prices and a quick response to ensure the continuity of work in construction sites and to avoid any delays or additional efforts for controlling quantities and supply operations.

The company's points of sale also provide the possibility of retail sale of tools and building supplies, within the highest standards of quality and excellence.

# Competitive Advantages

As for the competitive advantage, we will leave it to Mr. Hamada Anwar, Director of Sales and Operations, to tell you about it in detail:

“Controlling the quality of basic building materials is not an easy task; it is a process that usually drains the efforts of the investor and the client and of the work team, in addition to the difficulty of verifying the correctness of the supplied quantities of certain materials, especially sand-like ones.”

“Therefore, and driven by the wonderful reputation that we have enjoyed over 15 years, and which has enabled us to obtain the confidence of many investors and customers, Al Hammam Company offers an open and absolute guarantee and warranty for the quality and standards of any material supplied through it with the possibility of replacement at any time and under any circumstances in the event of any minor defect that calls into question the quality of the product, in addition to the exemption from paying the value of the supplied material in the event of any error in calculating the actually supplied quantity for the required quantity, and whatever the error percentage!”

# Competitive Advantages

The above guarantees stem from our full confidence in the honesty of our team members and their concern for the consumer's interest, through which we have gained the confidence of many major investors in Jordan, in addition to the fact that the response time to the supply request for large quantities is from 5 to 4 and a half hours, and the response rate for supplying orders Small is from two hours to two and a half hours only!

In addition to all of the above, the most important competitive advantage is our permanent ability to supply the required quantities to our customers at competitive prices lower than the current prices whatever they are, due to the spatial and financial warehousing capabilities of Al Hammam Company for the supply of building materials and the efficiency of its team and management.

# The Vision

Our future vision has already started to manifest as solid plans and translate into actions on the ground, and this can be summarized in the following points:

- 1-Achieving the highest storage capacity available in the Kingdom for basic building materials.
- We manufacture the 5 most demanded materials in the local market within the company's factories that operate within the best and latest standards.
- We are exclusive agents for more than 9 brands of quality building materials that will soon be supplied to the Kingdom.
- Reaching the highest response time rate and the largest transportation fleet that supplies building materials at the best competitive price
